

Instructions for filming your test in ZyberRide:

- Make sure you have a good phone, tablet or camera to record the test (it is your responsibility that the quality is good enough to judge the test).
- Make sure you ride in a place with good lighting conditions - whether you ride outdoors or indoors.
- The recording shall be done from C.
- The recording must be in wide format (phone / tablet must lay down).
- The horse/pony must be shown in the picture at all times and try to use the Zoom function so that we are close enough to judge the test. We know that it can be difficult/impossible to get the whole equiptage in the picture on the short side at C, where the recording is done, so here you are of course exempt - just do it as good as you can.
- It is your responsibility that the recording is of a quality so that the judge can judge the exercises.
- There must be sound on the recording, and the rider must not receive assistance during the test.
- Recording starts before the equiptage rides down the center line and lasts until the rider has completed the test (the judgement when entering the center line).
- The ride must be filmed from start to finish and the recording must not be interrupted.
- Do not edit in the recording.
